

Hitch a Ride

On-line Carpooling Service

Final Report for CS39440 Major Project

Author: Alexander Roan (alr16@aber.ac.uk)

Supervisor: Fred Labrosse (ffl@aber.ac.uk)

4th April 2014
Version: 1.0 (Draft)

Abstract

Hitch a Ride is an on-line carpooling service which enables people to share there journeys across the country with the aim of saving money and fuel.

The service encourages drivers to post the details of prospective journeys in the hope that hitchers will request to join them on their travels in exchange of a shared fuel price.

Something doo doo blah blah blah....

1 Introduction

1.1 Overview

1.2 Example Use Case

1.3 Existing Services

1.4 How This Compares

2 Objectives

2.1 Original Goals

2.2 Requirements

2.2.1 Interface Requirements

2.2.2 Functional Requirements

2.2.3 Database Requirements

2.2.4 Software Requirements

2.2.5 Performance Requirements

3 Development Process

3.1 Overview

3.2 Methodology

3.3 Planning

3.4 Prototypes

3.5 Research

4 Design

4.1 Overview

4.2 Technologies

4.2.1 PHP

4.2.2 JQuery

4.2.3 JSON

4.2.4 PSQL Database

4.2.5 Github

4.3 Service Infrastructure

4.3.1 University Hosting

4.3.2 LAMP Server

(PSQL instead of MySQL)

4.4 Service Design

4.4.1 Overview

4.4.2 Method

4.4.3 Structure of Database API

-Controllers -Models

4.5 Website Design

4.5.1 Overview

4.5.2 PHP

4.5.3 Bootstrap

4.5.4 JavaScript and JQuery Library

Google maps embedding

5 Implementation

5.1 Overview

5.2 PHP

5.3 Database

5.4 Database API

-procedural v OO

5.5 Website

-communication with API.

6 Testing

6.1 Overview

6.2 Database API Testing

6.2.1 Overview?

6.2.2 Unit Tests

6.2.3 Functional Tests

6.3 Website Testing

6.3.1 Overview

6.3.2 Functional Tests

7 Evaluation

7.1 Original Goals

7.2 Accomplishments

7.3 Future Improvements

7.4 Future Development

7.5 Design Choices

7.6 Approach
